# About Us

Kitchen makeovers, bathroom remodels, and other home renovations entail several phases: design, product selection and procurement, and construction, just to name a few. For many homeowners, finding the right contractors and suppliers for each stage of the process, and then having to coordinate timing and communication between multiple companies, can be at minimum a major inconvenience, at worst, a disaster.

Thankfully, Premier Kitchen & Bath offers an alternative. Founded in 1994, we are a specialty interior remodeling firm that offers comprehensive remodel services. Our designers will take you through the design process and help select the right materials and products for your project. Our employed craftsman will complete all the necessary construction. **We handle 100% of the project so you don't have to worry** about managing multiple companies, scheduling, and communication lapses.

With **over 150 years of collective design and remodeling experience**, Premier Kitchen & Bath has completed beautiful projects in nearly every style possible, including modern kitchen makeovers and spa-worthy bathroom remodels.

Premier Kitchen and Bath was awarded the Best of Houzz 2015, 2017, 2018. Guild Quality Rating 95%, BBB A+, Ranked on the Top Qualified Remodeler 2012, 2014 & 2016 Top 500 Remodelers and received special star recognition for association memberships, and specialized certifications.

# More About Us

Premier Kitchen and Bath was founded on the idea of bringing **seamless simplicity to the complex remodeling process**. Greg Heden, our founder, worked more than a decade in the trades before assembling his team of in-house, dedicated professionals that today collectively offer the **“red carpet” remodeling experience**. This means that Premier Kitchen and Bath designs, selects and procures, delivers, installs and warranties all the products necessary for a complete custom remodel.

Our ownership and responsibility of the entire project has produced an organized, and stress-free remodeling experience that has been embraced and appreciated by our clientele throughout the years.

When homeowners choose Premier Kitchen & Bath as their total design-build firm, they'll be working with a team that is dedicated to making the home remodeling process fun, easy, and seamless. We'll not only take the time to answer any questions you may have, **we'll also guide you through the entire process.**

# We Savor Every Detail

## Kitchens

Kitchens are the nerve center of the home. They become the secret storage of family recipes. Families gather and share memories during big holiday feasts. Children make their first cookies in this room while standing on the kitchen stool. With such importance on this room, it's no wonder this is the first space in the home that gets remodeled. When it's time to remodel the heart of your home, we love taking the time to understand your family's desires and priorities. Our designers and craftsmen will create the lifestyle kitchen that's just right for you.

## Bathrooms

This room is everyone's private little oasis from the world. It's where we center ourselves and get ready to tackle the world each day. It's also where we come to unwind and leave all the troubles of the day behind. Large or small, every bathroom should be a place of retreat and relaxation.

Whether you are looking for the grandeur of a luxurious bath, the ultimate spa experience with enveloping warm towels or an invigorating multi-head shower to wash away your stress...Premier Kitchen and Bath is ready to create your personal oasis.

# We Savor Every Detail

## Interiors

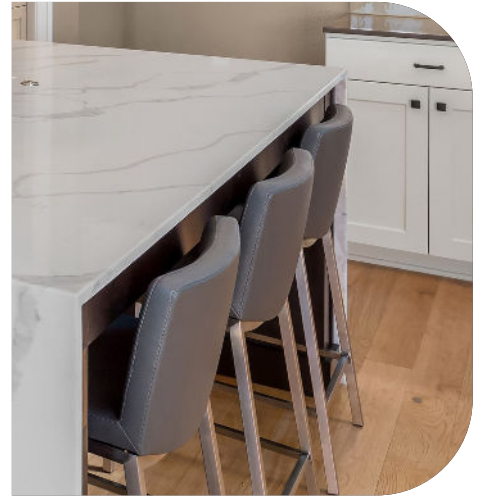

One can not live on kitchens and baths alone... Laundry, grand foyer entrances, media rooms, wet bars, sports rooms, man caves and sewing rooms are all places in our homes where we express who we are. What we have accomplished in our lives is often expressed through our living spaces. We understand this and want to bring it all to a reality in your home.

Our designers build and create these possibilities every day and would love to do the same for you. Your family and friends will come to love these rooms and spaces as much as we enjoy building them!

While the kitchen is busy with the kids learning how to make cookies and doing their homework, grown ups need their own space to relax and unwind. Times change and so do our needs within the home. Premier looks at your lifestyle today and where it might be in the future as we design your family space.

When we look at our home spaces, sometimes we can feel we've fallen behind and not kept up with changes in styles. Premier Kitchen and Bath is ready to roll you out of those doldrums and get your home caught up with your lifestyle.

# Our Services

## Kitchens

A kitchen sets the tone for your home and relationships. From entertaining guests of family and friends to a quiet evening of relaxation around the dinner table with your kids or significant others, the focal point of your home deserves a certain elegance and personal ambiance that fits who you are. From practical considerations such as the functionality of the cabinetry and appliances to the warm glow of under cabinet lighting illuminating the custom back-splash and countertops. Premier will furnish the design, products, and complete build out of your dream kitchen.

## Bathrooms

Whether in the daily chaos of getting ready each morning or the soothing comfort of “me” time, the bathroom has many roles to fill. How a bathroom fulfills the needs of your family's lifestyle is not taken lightly at Premier Kitchen & Bath. As with the kitchen, great detail is considered to ensure that your master bath, guest bath, kid's bath or powder room is the ideal space for whatever your lifestyle dictates. To you, this may mean an easy clean place for your kids to get ready for school, a safe place for those who are unsteady on their feet, the area you get ready in before a night on the town or a needed escape from a crazy day. Premier can and will create that wonderful reality for you.

# Our Services

## Interiors

Premier Kitchen & Bath is not limited to only two rooms in your home! We can explore and design many other areas as well. Is your fireplace boring or the flooring throughout the home a patchwork of miscellaneous materials that make no sense? What size TV fits in your entertainment center now or how efficient is your home office? Is there a wall that could be removed to open up the space allowing the whole family to fit or gives more room for your guests to feel included in conversations? Maybe you are building a new home and need the expertise of qualified designers and skilled craftsmen to create and install the cabinetry in all areas of your new home. Let Premier help to explore, design and make the whole house your dream home.

## Space Planning & Interior Design Execution

Your family's lifestyle, budget and long term plans are considered when creating the perfect floor plan and product for each specific space. Several options are usually considered and then narrowed down through detailed discussions and constantly revisiting your priorities that were discussed earlier.

Premier Kitchen & Bath has in-house professionals who have degrees in design and other specific training related to residential remodeling. These highly qualified designers will guide and direct you through the planning and design process of your exciting project.

Once the design process is completed Premier's experienced support team will check and double check the details, order and receive the product specific to your project. When all the product has arrived our experienced project manager and skilled craftsmen carry out the installation of your dream project. Remodel projects require quite a few specialized skill sets such as: design and planning, product selection (showroom) and procurement and various contractor disciplines (carpentry, electrical, plumbing, drywall, tiling, painting, etc.) and of course, management of the entire project.

Premier Kitchen & Bath combines all of these talents under one umbrella to help ensure a cohesive design and stress free experience for you and your family. Let's get started!

# Our Process

- ◆ **Your Needs & Ideas:** We ask that you accumulate a collection of notes, pictures, and/or sketches that will help convey your needs and desires to us (Houzz & Pinterest are great resources), and then prioritize them from most important to least. In addition, take some current digital photos of your existing room and, if possible, a few quick dimensions of the space being considered for remodeling.
- ◆ **Free Consultation:** You are welcome to drop by our showroom and introduce yourself to one of our friendly designers, but calling ahead will assure that we will have set aside the hour that is needed to thoroughly discuss your potential project. During this consultation, we will review all the pertinent information regarding your project and help define and/or refine your priorities. We will also advise you as to the feasibility of the project in regards to timeline, investment, and other expectations. For most clients, understanding the investment needed and defining what that includes, is a top priority. From our discussions and project review, we will establish an appropriate "Investment Bracket" for your specific project. This bracket will be comprehensive of the preliminary scope of work, product ideas, and other project priorities that were identified earlier.
- ◆ **The Next Step:** After spending an hour together, our designers will have a good feel for your project and what it will entail to bring it to fruition. Likewise, you will have a better understanding of the ability and value that Premier can offer you. If you feel confident that Premier is a good fit for the project you are considering, the next step would be to schedule an in-home appointment. This step requires a design retainer that is based on the size and complexity of the project.
- ◆ **Design Your Space:** In order to produce a detailed professional and comprehensive proposal, we need to visit your home. During the visit we will ask more questions based on the priorities we had set earlier. We will photograph, sketch, and dimension the area(s) and take in to account all electrical, plumbing, and framing considerations.

# Our Process

- ◆ **Presentation & Scope Of Work:** After the design, product selection and scope of work have been finalized, our working document will be signed by both parties and a deposit will be collected to commence the project.
- ◆ **Pre-Construction Meeting:** After the contract signing and prior to work starting, our project manager and designer will meet with you at your home for a pre-construction meeting. At this time, job site details such as: product delivery, home access, job-site protection, and scheduling will be discussed. This meeting also provides an opportunity for your project manager to see the job-site and discuss any special needs or details prior to the commencement of your project.
- ◆ **Work Begins:** This is the working phase of the project. The length of this phase can vary from a few days to a few months depending on the size and scope of your project. Throughout this phase, you will become very well acquainted with our personable in-house craftsman. You will also see your project manager and designer stop by at various intervals to assure all the details are carried out as planned.
- ◆ **Project Completion:** During this phase of the project all the details and remaining items come together to complete the finished look. At this time, increased job site visits and effective communication by the project manager help bring the project to a close in a timely manner.
- ◆ **Final Job-Site Review:** The final step in our process is for the project manager to perform a final job-site review to see that everything has turned out as planned and that you are completely satisfied with the outcome. With your permission, we will set a date and time to take photos of your completed project to help inspire other homeowners that are just embarking down the remodeling road.
- ◆ **Our Guarantee:** Premier Kitchen and Bath wants you to have peace of mind knowing that the investment in your remodel is protected. We provide an unparalleled ten (10) year unconditional warranty on all construction labor. We are here to make sure your remodel brings you years of enjoyment!
